

MUHAMMED SHASAL TK

UI/UX Designer
cum web Developer

I'm an UI/UX designer with a sharp eye for detail and a deep love for digital experiences that just feel right. Blending design with code, I craft clean, responsive, and user-first interfaces that not only look great but work beautifully. With a growing foundation in web development, I bring both creative vision and technical understanding to every project. Whether I'm prototyping in Figma or building live interactions on the web, I aim to deliver designs that are intuitive, engaging, and future-ready.
